

TOYAMA HAMONO

AMEICO

Forged with passion by heat, force and human hands

Toyama Hamono — More Than a Tool. A Piece of Japanese Craftsmanship.

Some tools simply get the job done. Others become favorites you reach for every day. Toyama Hamono belongs in the second category.

Founded in 1861 in the renowned metalworking city of Sanjo, Niigata, Toyama Hamono has spent more than 160 years and five generations perfecting the art of crafting exceptional pruning shears, bonsai tools, floral snips, and garden scissors. What began as a small family forge remains dedicated to the same commitment to quality and craftsmanship today.

Traditional Craftsmanship. Modern Performance.

Every Toyama Hamono tool begins with tanzo (traditional forging), where high-carbon steel is heated, shaped, and refined for exceptional strength and durability. Each tool is then individually hand-adjusted to achieve perfect blade alignment, smooth action, and outstanding balance. The result is clean, effortless cuts and a tool that feels like a natural extension of your hand.

Made to Be Used, Refined to Last.

Toyama Hamono believes great tools should last a lifetime—not a season. Premium forged steel, thoughtful construction, and replaceable components allow each piece to be maintained, treasured, and even passed down through generations. Over time, the handles develop character while the smooth action only gets better.

A Legacy of Excellence.

Today, the fifth generation continues to blend centuries-old Japanese blacksmithing traditions with modern innovation, creating tools trusted by gardeners, florists, bonsai artists, and professionals around the world.

Once you experience the precision, razor-sharp blades, exceptional comfort, and beautiful craftsmanship of a Toyama Hamono tool, you'll quickly understand why it has earned a reputation as one of Japan's finest makers of handcrafted cutting tools.

T1s OKUBO GARDEN SHEARS

Hand-Forged Garden Shears Made with YSS
Shirogami Carbon Steel

These hand-forged **Okubo Garden Shears** feature a keen, knife-like cutting edge, making them well suited for pruning plants. Their lightweight, traditional Japanese-style design provides smooth, comfortable handling for a wide range of gardening tasks. The blades are made from YSS Shirogami, a high-purity carbon steel used in premium cutting tools. It is easy to sharpen and can be honed to a keen edge. The black finish on the handles is created through a heat-treatment process in a dedicated furnace, without the use of conventional paint. This method preserves the natural character of the metal and gives each pair a distinctive, understated appearance.

DETAILS:

- Hand-forged blades made from YSS Shirogami carbon steel
- Keen cutting edge suitable for pruning plants
- Easy to sharpen and maintain
- Lightweight and comfortable to handle
- Blackened handles finished through heat treatment rather than conventional paint
- Natural finish that highlights the character of the metal
- Do not cut anything other than wood or plants
- Overall dimension: L: 6.5" Blade Length: 2"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$115.00 WHOLESALE: \$57.50**

T8 WARABI FLORAL SHEARS

Hand-Forged Ikebana Floral Shears

These hand-forged **Warabi Floral Shears** feature a sharp, knife-like edge that provides exceptional durability, making them ideal for fresh flowers. This traditional Japanese ikebana floral shear features a unique handle design called "Warabi-te." Once familiar with its shape, users can enjoy a smooth and lightweight cutting experience. Many practitioners of ikebana (traditional Japanese flower arrangement) use this style for their floral work. The black grip is achieved through a chemical-free 'baking' process in a dedicated furnace, ensuring no chemicals typically found in regular paints are used. The shears are finished with a natural hue, produced using an environmentally friendly manufacturing method.

DETAILS:

- Hand-forged carbon steel blade for sharpness and durability
- Unique "Warabi-te" handle design for smooth, lightweight use
- Perfect for Ikebana and other floral arrangements
- Eco-friendly black grip, achieved through a chemical-free baking process
- Natural finish, produced with an environmentally friendly method
- Do not cut anything other than wood or plants
- Overall dimension: L: 6.5" x Blade Length: 2"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$105.00 WHOLESALE: \$52.50**

T4-4 KOEDA SCISSORS

Hand-Forged Bonsai Small Branch Pruning Shears

These hand-forged small branch **Koeda Pruning Shears** feature a short blade and long overall length, designed for precise pruning by fitting easily between leaves and branches. The shears offer a sharp, knife-like cutting edge for clean cuts and exceptional durability, making them ideal for bonsai work. They are also perfect for indoor gardening and houseplant care.

The black grip is achieved through a chemical-free 'baking' process in a dedicated furnace, ensuring no chemicals typically found in regular paints are used. The shears are finished with a natural hue, produced using an environmentally friendly manufacturing method.

DETAILS:

- Hand-forged high-carbon steel blade for sharpness and durability
- Perfect for bonsai work, indoor gardening, and houseplant care
- Please do not cut anything other than live wood or plants.
- Precision cutting for delicate branches and leaves
- Eco-friendly black grip, achieved through a chemical-free baking process
- Natural finish, produced with an environmentally friendly method
- Overall dimension: L: 8.25" x Blade Length: 2.25"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$125.00 WHOLESALE: \$62.50**

T13-O PRUNING SHEARS, ASYMMETRICAL OLIVE LEATHER GRIP

Hand-Forged Pruning Shears With Leather Cover

These hand-forged **Asymmetrical Pruning Shears** feature a round, high-carbon steel blade that delivers a sharp, knife-like cutting edge, providing exceptional durability. They are perfect for pruning branches and plants.

The handle design, an original creation by Toyama Hamono, features an asymmetrical ergonomic shape, offering both comfort and the ability to apply more force with ease. This design continues to receive high praise from users for its superior grip and control.

The black grip is achieved through a chemical-free 'baking' process in a dedicated furnace, ensuring no chemicals typically found in regular paints are used. The shears are finished with a natural hue, produced using an environmentally friendly manufacturing method.

DETAILS:

- Hand-forged high-carbon steel blade for sharpness and durability
- Perfect for pruning branches and plants
- Please do not cut anything other than live wood or plants.
- Asymmetrical ergonomic handle design for comfort and ease of force application
- Eco-friendly black grip, achieved through a chemical-free baking process
- Natural finish, produced with an environmentally friendly method
- Overall dimension: L: 8" x Blade Length: 2.5"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$199.00 WHOLESALE: \$99.50**

T26-B PRUNING SHEARS - MULTI-PURPOSE BLACK LEATHER GRIP

Hand-Forged Multi-Purpose Pruning Shears with Black Leather Grip

These hand-forged **Multi-purpose Pruning Shears** feature a long, slim blade that offers effortless cutting with a knife-like sharpness and exceptional durability, making them perfect for pruning roses, flowers, and plants. The compact design ensures a comfortable fit for both large and small hands, providing versatility for a wide range of users.

The black grip is created through a chemical-free 'baking' process in a dedicated furnace, giving it a natural finish and an eco-friendly manufacturing method. Additionally, the grip is wrapped in genuine leather for enhanced control, making it superior to standard models.

DETAILS:

- Hand-forged carbon steel blade for sharpness and durability
- Compact design that fits comfortably in hands of all sizes
- Eco-friendly black grip with a natural finish, achieved through a chemical-free baking process
- Ideal for pruning roses, flowers, and plants
- Please do not cut anything other than live wood or plants.
- Overall dimension: L: 7.5" x Blade Length: 2.25"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$199.00 WHOLESALE: \$99.50**

T27-C PRUNING SNIPS - ASYMMETRICAL CAMEL LEATHER GRIP

**Hand-Forged High Carbon Steel Snips with Camel
Leather Wrap**

These hand-forged **Asymmetrical Pruning Snips** feature a razor-sharp edge that bites in like a quality kitchen knife, delivering clean, precise cuts. They offer excellent durability and are ideal for pruning and thinning bonsai, flowers, and indoor plants. The slim, tapered blades slip easily into tight spaces, making them perfect for detailed trimming work. Toyama Hamono's original handle design is highly praised for its comfortable, secure grip, and the genuine leather wrap further enhances grip and control.

DETAILS:

- Hand-forged craftsmanship: Each pair is carefully hand-forged for precision, balance, and long-lasting quality.
- Razor-sharp cutting edge: Bites in like a finely honed kitchen knife for smooth, clean cuts.
- Tapered blades for detail work: Narrow tips reach into tight spaces for precise pruning and thinning.
- Ergonomic leather-wrapped handles: Original Toyama Hamono handle shape with genuine leather wrap for a comfortable, non-slip grip.
- Please do not cut anything other than live wood or plants.
- Overall dimension: L: 7.75" x Blade Length: 2.75"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$199.00 WHOLESALE: \$99.50**

T101 PRUNING SNIPS - SYMMETRICAL WALNUT WOOD GRIP

Hand-Forged Pruning Shears/Secateurs with Walnut Wood Grip

These hand-forged universal **Asymmetrical Pruning Shears** feature a sharp, knife-like edge that offers exceptional cutting performance and durability, making them perfect for pruning branches and plants.

The handle, an original design by Toyama Hamono, is seamlessly fitted with natural walnut wood, offering a warm, comfortable feel in the hand.

DETAILS:

- Hand-forged high carbon steel blade for sharpness and durability
- Razor-sharp, knife-like edge for clean, precise cuts
- Perfect for pruning roses, flowers, branches, and plants
- Original Toyama Hamono handle design with integrated natural walnut wood
- Please do not cut anything other than live wood or plants.
- Overall dimension: L: 7.75" x Blade Length: 2.25"
- Made in Japan
- **Minimum 3 per style**
- **MSRP: \$250.00 WHOLESALE: \$125.00**

T102 PRUNING SHEARS - MULTI-PURPOSE WALNUT WOOD GRIP
