

LOGGOS™

A Gripping Statement Piece

AMEICO

IT'S IN THE ART OF THE BALANCE

Loggos is the stacking game that turns curiosity into architecture and everyday moments into small celebrations, handcrafted in South Germany from beautifully grained regional beech wood and noble Canadian walnut, each piece sanded smooth, perfectly weighted, and finished with a clever grip foil that keeps daring structures stable—or lets them tumble when the game calls for it.

Developed by the Stuttgart label Frechling to support motor skills and produced in inclusive workshops using certified, sustainable materials,

Loggos invites kids and adults alike to experiment, balance, rebuild, and laugh together, and is even used in occupational therapy, dementia care, and ADHD support as a tactile, grounding way to connect people of all ages.

LOGGOS - BEECH MEDIUM
